#### From the Scottish American The Canadian Tariff-Taik abo to Annexation.

On the invitation of a Mr. King, who is a no body in Canada, but is elevated to considerable attoriety by some of the New York papers, we are had quite a discussion during the past week about the propriety of Canada annexing itself to the United States. This is one of the usual flashes in the pan that we are accustomed to every few months in connection with this subject. The 'Hera'd' it will be remembered detected a grand filibustering design among the blue noses few months ago, because one or two gentlemen imaginary projects of annexation, not without be desirable for any of the British provinces, or Fleroely the combatants fought, while the Juniors stood of a rebellion which is believed to be close at bench, and the hangman, a negro disguised with a loose black domino and a mask, fixed the rope around their necks and disappeared in the cell believed to be close at wood give in.

The jury have duties now levied by the Government of the Union and these daties are exacted on a principle which would place the Upper Province on the very footng precisely on which it has now been placed by the new tariff. How annexations, therefore, could possibly have the effect of believing Upper Canada from the disadvantage to which its merchants are now incidently subjected we are at a less to under-

We maintain, then, that Mr. Galt's toriff which has now received the royal sanction from the Governor General is, in its leading principle, perfectly just, whatever may be the character of some of its details. It is a bold measure, no doubt, and must effect a considerable change in commercial relations. But it is only an act of justice to the country at large, and while it will give a more immediated advantage to Lower Canada, there is no part of the country and no section of the community, except a limited class of traders in Upper Canada, who will not benefit by it. It almost revolutionary characters seems to have ex cited opposition from parties not usually opposed to the present Ministry. But apart from loca influences, viewing the measures peither through the medium of Briti h prejudice from which we are just as free as from undue partiality for American connection, with reference simply to the common interests of the whole country administered by the Provincial Government, we do think that the measures is eminently sound and just in principle, and that the outery against it has merely been raised on account of its reversing a previous wrong and injustice which time had sanctioned in the public opinion.

#### JUDGE and JACK-KETCH

A desire for independence is natural to man and beast. It is indeed, an instinctive desire No sooner have the lower an mals the means of procuring all that they need to existence than independent action commences, and so it is with individual human beings, with families of the human race, and with districts of new countries as with new countries in the lump. Durham, the county in which we live, has at length arrived at that state of advancement, when an independent existence for judicial perposes becomes a ner cessity, as it is about to become a fixed fact. A Bill for an act of parliament to separate, judicial ly, Durham from Northumberland, bas already passed through a Committee of the whole in the Legislative assembly by a majority of 23, the expediency of such separation and the selection of a county town being, however left to the Reeves of the county, who are required to come to a decision by the 15th of June next. That they will decide in favor of separation and in favor of that town for the transaction of business which is most easily accessible from every corner of Durham we have no doubt whatever. Speedy justice is cheap justice, and the division of court business, which separation will insure, must be beneficial to described in said Mostgage being composed of PART or all, who have debts to collect or difficulties to LOT NO 3 in Broken front Concession of the Towns hip

In addition to a Court House and gool, to be bailt at the expense of the county town, the fol lowing officers when separation takes place will be required :- A county Judge, a Clerk of Court a Clerk of the Crown, a Clerk of Surrogate, a Clerk of the County, a Treasurer for the County, a Steratural Depair Steria, a county Attorney a Gaoler, a Hangman and a Jack-ketch, a tip staff, Bailiffs and Bumbailiffs, and a host of LIF ASSOCIATION OF SCOTLAND POINDEDIS 8. others, too numerous to mention, who will be paid at no, or little ad litional cost to Durham, and even, indeed, at less cost, than at present, the greater facilities for transacting busine being considered. The only sufferers will be tomajor portion of the officers of the present antecounties, whose incomes will be necessarily d. min.shed, but these will suffer nobly for their count y s good.

There will be great scrambling for fat little berths in Darmann soon. Who is to be Judge and was Jack-ketch, are matters of some mos men L

#### DR MORSE'S INDIAN ROOT PILLS.

DR. MORSE, the inventor of MORSE'S INDIAN ROOT PILLS, has spent the greater part o is life in travelling, having visited Europe, Asia, and Africa, as well as North America-has spent three years among the Indians of our Western country—it was in this way that the Indian Root Pills were first discovered. Dr. Morse was the first man to establish the fact that all diseases arise from MPURITY OF THE BLOOD-that our strength,

ealth and life depended upon this vital fluid. when the various passages become vlogged, and to not act in perfect harmony with the different unctions of the body, the blood loses its action, ecomes thick, corrupted and diseased; thus causing all panes, sickness and distress of every name; or strength is exhausted, our health we are depriv ed of, and if nature is not assisted in throwing off the starmant humors, the blood will become choked and case to act, and thus our light of life will forchalf, and it is now as much as ever dependant e ver be blown out. How important then that we should keep the various passages of the body free Advertisements, not at a variance with the chart in our power to put a medicine in your reach, ter of the paper, will be be inserted in semi-weet to make the control of the paper, will be be inserted in semi-weet to put a medicine in your reach, and you assert cents per line for first insertion, and to me plants and roots which grow around the mountaints for each captured to be a part of the paper. And how pleasant to us that we have it rom plants and roots which grow around the mountainous clars in Nature's garden, for the health and recovery of diseased man. One of the roots from which these Pil's are made is a Sudorific, which pens the pores of the skin, and assists Nature in hrowing out the finer parts of the corru ti n within. Every family should take a city paper in addition browing out the finer parts of the corm it is within, to the local in w paper. The latial is necessary. The second is a plant which is an Expectorant, that on account of the the local intelligence it give opers and unclose the passesses to the lungs, and whilst the former is valuable for its general information, in a sorthing manner, performs its duty by throwing off phlegm, and other humors from the lungs by copious spitting. The third is a Dinretic, which gives ease and double strength to the kidneys; thus encouraged, they draw large amounts of impurity from the blood, which is then thrown out plentifully by the urinary or water passage, and which could not have been discharged in any other way. The fourth is a Cathartic, and Eccompanies the other properties of the Pills while engaged in purifying the blood; the coarser particles of impu-rity which cannot pass by the other outlets, are thus baken up and conveyed off in great quantities by the

From the above, it is shown that Dr. Morse's Indian Root Pills not only enter the stomach but the come united with the blood, for they find a way to every part, and completely rout out and cleanse the system from all impurity, and the life of the body, which is the blood, becomes perfect y healthy; oused entity all sickness and pain is driven from he system, for they cannot remain when the body ecomes so pure and clean.

The reason why people are so distressed when ick, and why so many die, is because they do not a medicine which will pass to the afflicted parts, THE SUBSCRIBER having bought out that extensive and well selected Stock of the cast out; hence, a large quantity of tensive and well selected Stock of the cast out; hence, a large quantity of and other matter is lodged, and the stomach ad intestines are literally overflowing with a cor-DRY GOODS AND GRICERIES pid infestines are interally overflowing with a corporate of the conference of Former'y belong ng to D.
