Farm Storage Ice May Be Formed In Moulds-Blocks-Loading and Packing-

Agriculture, Toronto.)

The Use and Abuse of Sawdust.

The ice crop every winter in Canada is an enormous one, and if it Table of Blouses to clear from \$1.00 could be marketed in the cities for to\$2.98 each summer use, the revenue would amount to many millions of dollars. The farmers must rely upon the ponds, rivers and lakes close by for their supplies, as it has not been as there are few if any bodies of water large and pure enough to freeze water to sufficient thickness. Farmers We have quoted prices on a few could make their own ice, weather ually freezing them full, or by making a solid block of ice in a metal lined chamber by pumping into it a little water every day or so and allowing it to freeze solid. Twenty cakes of ice, each 18 inches square and 12 inches thick, would make a ton of ice as stored.

Still another method for manufacturing ice on the farm is to make an artificial pond where there is an Dabundant supply of water available course on the thickness of the ice. If the probable freezing will make square feet of pond surface is required for each ton needed.

The usual method of harvesting 27-29-5-10-9. the supply of ice for the farms is to Mr. F. G. Bouskill, College street, stream or lake and haul it home and
